

Forms & Gears bags new orders

The fixture manufacturer has received a slew of new business orders from the automotive industry and has tied up with Vektek of the US, says **C Shyam Sundar**.

State-of-the-art equipment in place at the Forms & Gears factory for manufacture of machining centre fixtures.

The order book for Chennai-based Forms & Gears, Asia's leading fixture manufacturer which supplies machining centre fixtures worldwide to the world's leading automobile and machine tool manufacturers, is looking good. Recently, the company bagged a repeat order from Mahindra & Mahindra for designing and manufacturing hydraulic fixtures for the new-generation Scorpio SUV. And recently the company has partnered with the US-based Vektek, to bring high pressure hydraulic fixtures to India. Vektek is a power clamping specialist whose rugged hydraulic and pneumatic swing, link and

In association with Vektek, Forms & Gears is bringing high pressure hydraulic fixtures to India.

edge clamps, work supports, cylinders and pallet fixture accessories have earned an industry-leading reputation in medium and high-production industries.

Prior to this, Forms & Gears added Cummins India to its long list of major clients. "It is an indication of our abilities," says Reji Verghese, managing director, and adds that "our hydraulic fixtures go to some of the biggest names in the automobile industry too."

Forms & Gears has joined hands with Vektek, the market leader for hydraulics in the US, to introduce high pressure hydraulic fixtures in India. "We are probably the only company in
